MEETING MINUTES
THURSDAY, SEPTEMBER 15, 2022

• **Preliminary Plan Application Review 2022-06-06-112 "continued"**

Chairperson Schultz stated that he needed help with the review of the Central Business Park application, as he felt that the application had already been addressed in last month's Planning Commission meeting.

Mr. Callender explained that the previous application was for a Lot Line Adjustment at the same location, and it had been processed and signed.

Mr. Wilkes added that there were two, (2), separate applications – one, (1), for the Lot Line Adjustment and the other for the Preliminary Plan.

Mr. Jonathan Richard, P.E., was given the opportunity to provide information about the Application and he provided the following:

- The plan consists of the following:
 - Eight, (8), mainly construction buildings
 - Each building to be equipped with:
 - ❖ Small office
 - ❖ Garage
 - ❖ Construction area
 - Four, (4), acres
 - 48,000 square feet
 - 50% building coverage at minimum green space requirements
- Parking space plans may have to be revised
- Zoning will be I-1, (*Light Industrial*)
- Building height will be single story
- There will be deed restrictions
- Variances should not be required
- Kent County and Fire Marshall approvals will be supplied after this meeting
- Agreement with the remainder of the Town Engineer's comments that have not yet been addressed

Mr. Wilkes additionally stated that he is okay with the proposed zoning, but his final agreement is contingent upon receipt and review of the grading plan; and the requirements for building in the water resource protection area. Mr. Richard responded that the recharge area will be shown on the plans and any issues will be worked out with the Town to provide the safeguards as required by the Land Use Ordinance, as the existing ponds appear to be "wet ponds". (*Wet ponds = always have a pool of water vs. Dry ponds = only have water have a rain event*)

MEETING MINUTES
THURSDAY, SEPTEMBER 15, 2022

• **Preliminary Plan Application Review 2022-06-06-112 *“continued”***

Mr. Wilkes provided a caution to flush out with the State/DNREC their requirements for building in recharge areas. Mr. Richard responded that in his experience the municipality has the final authority as to the building requirements as it applies to recharge areas.

Chairperson Schultz asked if a motion was ready to be made and Town Engineer Wilkes recommended that the Planning Commission acting on the application until:

- 1 – the Planning Commission had more time to review the plans; two members claimed they had not rec'd plans.
- 2 – the work needed to meet the Preliminary Plan requirements per the Land Use Ordinance are met.
- 3 – The water resource protection area on the site which may restrict some types of construction is checked with the Conservation District to explore restrictions on land development in these areas.

Mr. Wilkes concluded by stating that these are my recommendations, but the Planning Commission can act as they see fit.

Chairperson Schultz asked for a motion and Commissioner Naples made a motion to recommend the Preliminary Plan Application 2022-06-06-112 for approval by the Town Council contingent upon the applicant addressing and meeting all comments made at this meeting. Commissioner Cooper made a second to the motion and a roll call resulted in the passage of the motion as stated.

Mr. Callender made a statement that there is a PLUS comment from the State Historical Society that indicates the applicant should engage in an archaeological survey prior to any ground disturbance.

With no further comments, the meeting moved on to Old Business.
